APPLICATION YEAR: 1990

STATE OF OHIO

INFRASTRUCTURE BOND PROGRAM

DISTRICT 2, HAMILTON COUNTY

PROJECT APPLICATION

Jurisdiction/Agency: North College Hill Population (1980): 11,114

Project Title: LaBoiteaux Avenue Improvements

Project Identification and Location: between Galbraith Road and  
Corp Limits - 4000 LF +/-

Type of Project: Rehabilitation ☒ Replace ☐ Betterment\* ☐

(Mark more than one box if there are expansion elements such as 2 lane bridge being replaced with a 4 lane bridge)

Explanation of Betterment Elements of Project\*: \_\_\_\_\_

N/A

Road ☒ Bridge ☐ Flood Control System (Stormwater) ☐

Solid Waste Disposal Facilities ☐ Waste Water Treatment Systems ☐

Storm Water and Sanitary Collection Storage & Treatment Facilities ☐

Water Supply Systems ☐

Detailed Description of Project\*\*: Rehab of existing pavement; work to  
include but not limited to curb replacement, replacement of undersized  
and deteriorated storm drains and catch basins, concrete base rehab,  
joint repair, resurface with asphaltic leveling and wearing surface,  
driveway adjustments and aprons

Type of Issue 2 Funds: District 2 ☒ Small Government ☐

Water/Sewer Rotary ☐ Emergency ☐

\* See definition of Betterment attached.

\*\* Attach additional sheets if necessary.

1. Of the total infrastructure within the jurisdiction which is similar to the infrastructure of this project, what percentage can be classified as being poor to very poor in condition, adequacy and/or serviceability.

Typical examples are:

Road percentage=  $\frac{\text{Miles of road that are poor to very poor}}{\text{Total mileage of road within jurisdiction}}$

Storm percentage=  $\frac{\text{Length of storm sewers that are poor to very poor}}{\text{Total length of storm sewer within jurisdiction}}$

Bridge percentage=  $\frac{\text{Number of bridges that are poor to very poor}}{\text{Number of bridges within jurisdiction}}$

Roads 20% in poor condition

Storm Sewers 30% in poor condition

2. What is the condition of the infrastructure to be replaced or repaired? For bridges, base condition on latest general appraisal and condition rating.

Closed	_____	Fair to poor	XX
Extremely poor	_____	Fair	_____
Poor	_____	Good	_____

■ Give a brief statement of the nature of the deficiency of the present facility such as: inadequate load capacity (bridge), surface type and width, structural condition of surface, substandard: berm width, grades, curves, sight distances, drainage structures, sanitary sewers, and water mains. List the age of the infrastructure to be repaired or replaced using one of the following categories: less than 20 years, 20-29 years, 30-39 years, 40-49 years, 50 years or older

Base is over 50 years old, asphalt overlay is over 20 years old.

Pavement is in a distressed condition with reflective cracking and differential settlement due to base failure and improper drainage.

3. If State Issue 2 funds are awarded, how soon (in weeks or months) after completion of the agreement with OPWC would the opening of bids occur?

■ Please indicate the current status of the project development by circling the appropriate answers below.

- |  |            |    |     |
|--|------------|----|-----|
| a) Has the Consultant been selected?.....            | <u>Yes</u> | No | N/A |
| b) Preliminary development or engineering completed? | <u>Yes</u> | No | N/A |
| c) Detailed construction plans completed?.....       | <u>Yes</u> | No | N/A |
| d) All right-of-way acquired?.....                   | <u>Yes</u> | No | N/A |
| e) Utility coordination completed?.....              | <u>Yes</u> | No | N/A |

Give estimate of time, in weeks or months, to complete any item above not yet completed. Project can be bid immediately

4. How will the proposed infrastructure activity impact the general health, welfare, and safety of the service area.

■ Where applicable, comment on the following:

a) Overall safety, including accident reduction (Accident records should be attached, if available). \_\_\_\_\_

Marginal

b) Emergency vehicle response time (fire, police, & medical) \_\_\_\_\_

Marginal

c) Other factors (i.e., fire protection, health hazards, etc.) \_\_\_\_\_

N/A

d) Additional User Costs - The additional distance and time for the users to travel a detour or an alternate route \_\_\_\_\_

Insignificant

e) When project is completed, how will it impact adjacent businesses? \_\_\_\_\_

Minimal impact to businesses

5. Are matching funds available? (i.e. Federal, State, MRF, Local, etc.)

To what extent of anticipated construction cost?

■ List the type and amount of funds being supplied by the local agency. This amount may be from local, Federal, State, Municipal Road Fund (MRF), or other sources. Explain additional funding through other sources being applied for or received for the project. Also, explain any need to accumulate funds for construction at a later date. Complete LOCAL FUNDING SOURCES on Page 6.

■ The local agency shall supply a minimum of 10% of the anticipated construction cost. Additionally, the local agency shall pay for all costs of engineering, inspection of construction, right of way, and the betterment portion of the project. Complete ESTIMATED COST OF PROJECT, on Page 6.

6. Has any formal action by a federal, state, or local government agency resulted in a partial ban or complete ban of the use or expansion of use for the involved infrastructure?

■ Are there any roads or streets within the proposed project limits that have weight limits (partial ban) or truck restrictions (complete ban)? Have any bridges had weight limits imposed on them (partial ban) or truck prohibitions (complete ban)? Have the issuance of new Building permits been limited (partial ban) or halted (complete ban) because the existing storm/sanitary sewer or water supply system in a particular area is inadequate? Document with specific information explaining what type of ban currently exists and the agency that imposed the ban.

No

7. What is the total number of existing users that will benefit as a result of the proposed project? Use appropriate criteria such as households, traffic counts, ridership figures for public transit, daily users, etc., and equate to an equal measurement of users.

■ For roads and bridges, multiply current documented Average Daily Traffic by 1.2 occupants per car (I.T.E. estimated conversion factor) to determine users per day. Ridership figures for public transit must be documented. Where the facility currently has any restrictions or is partially closed, use documented traffic counts prior to restriction. For storm sewers, sanitary sewers, water lines, and other related facilities, multiply the number of households in the service area by four (4) to determine the approximate number of users per day.

ADT 2700 upd

daily users  $2700 \times 1.2 = 3400$

8. The applicant has conducted a study of its existing capital improvements and their condition. A five year overall Capital Improvement Plan (that shall be updated annually) is attached or on file with the District 2 Integrating Committee for the current year or shall be submitted by March 31 of the program year. The Plan shall include the following:

- a) An inventory of existing capital improvements, including their condition,
- b) A plan that details capital improvements needs during the next five years and,
- c) A list of the political subdivision's priorities in addressing these needs.

The attached Form 1 shall be completed for those projects which are being submitted for Issue 2 funds.

9. Is the infrastructure to be improved part of a facility that has regional significance? (Number of jurisdictions served, size of service area, trip lengths or lengths of route, functional classification)

Project has regional impact serving Hamilton County

North College Hill and Mt. Healthy
